

Everyday Favourites British Peas

From field to fork

The story from our suppliers and growers

October

Pea Planning time!
start to plan for next years crop

Seed orders are placed. Seeds come from far and wide even New Zealand

December

Weather and location planning in time for planting

Pea seeds begin to arrive on the farms

January

In a normal year mid-May is the time to complete planting

May

April

The peas are now planted on the best quality land. They are monitored closely for pests and disease

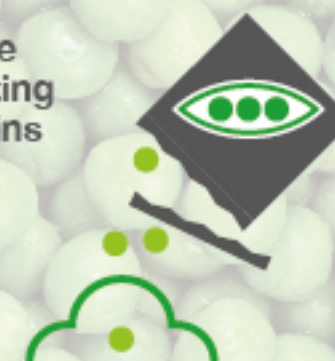

Planting continues. The higher the temperature the quicker farms plant

March

February

The planting begins

June

Sampling begins using a nifty machine known as a tenderometer, which squidges the pea to test its tenderness

July

It's action time! 24 hours a day, 7 days a week, harvesting machines are on the move to get the peas from field to frozen as quickly as possible.

August

The end is in sight. Farmers will often work together as a team to get the job done.

Phew! Now time to learn from this season's crop and rest.

September
