

Everyday Favourites Broccoli Florets

From field to fork

The story from our suppliers and growers

June

The process begins!
Seedlings begin to be
cultivated in nurseries
for around 4 weeks.

July

It's the start of the
planting season once
the plants have taken
within the nurseries.
They have a 90 day
gestation and growing
period to harvest.

Mid-October to
end of April

Harvesting begins
initially from the north
of Spain in Navarra,
moving south following
the heat, through
Albacete and down
into Murcia.

All Year Round.

The product is packed
all year for Bidfood
customers.
