

# Bidfood Sustainability Policy

Corporate responsibility and sustainable development are a key part of our proposition and fundamental to our unique values: care, share and dare.

Our vision is to be the best foodservice provider and a force for change, because we care about our people, our planet, our customers, our communities and our principles. The ways in which we bring that vision to life are explained in our annual sustainability report, which can be found via the link below.

We are a coalition member of the Better Business Act, a campaign that aims to change the UK law to ensure every company in the UK aligns their interests with those of wider society and the environment.

We launched and continue to support plate2planet, a LinkedIn group which exists to encourage foodservice businesses to share best practice, ideas and innovation. More information about our sustainability programme can be found at [www.bidfood.co.uk/sustainability](http://www.bidfood.co.uk/sustainability)

We comply with all applicable regulations and standards, exceeding requirements where possible. We are committed to making real progress to mitigate our social and environmental impacts, providing our customers with a real choice of ethical and healthier products.

We seek to inspire our people to be socially and environmentally responsible and to encourage community engagement.

Our targets are reviewed annually within our independently validated sustainability report, which is available on our corporate website, via the link above.
